***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Marsh (5471405).

Marsh shows a shoe with a sole and shock absorbing capability comprising a sensor (14L), operational circuitry (32L), and a display apparatus (20) as claimed.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 4-13, 15-20, and 22-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marsh in view of Mott.

Marsh as discussed above shows a shoe and inherent method substantially as claimed except for the exact power source and a resistor network. Mott teaches using the piezoelectric sensor as a power source and teaches providing a resistor network. It would have been obvious to use the sensor as the power source and to provide a resistor network as taught by Mott in the shoe of Marsh to reduce the number of components and to make the circuit more durable.

Claims 22-24 appear to be obvious/inherent methods of using the invention of Marsh.

***Allowable Subject Matter***

5. Claims 14 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Information Disclosure Statement***

6. The information disclosure statement filed 2/26/03 fails to comply with 37 CFR 1.98(a)(1), which requires a list of all patents, publications, or other information submitted for consideration by the Office. It has been placed in the application file, but the information referred to therein has not been considered.
